

If they can't find it, you don't have it...

A powerful content management system enables you to organize, find, and differentiate all the content efficiently. You can have a keen eye on everything a content provider uploads.

Moreover, our content management system allows you to organize your content based upon content information (title, artist, etc). You can create categories and place content in more than one category. Generate automatic categories e.g. the top 10 tones sold most, and the category will be always up to date. Create seasonal categories or promotional categories to drive sales.

Subscribers can browse content, view information, pre-listen and purchase. You and/or each of your content providers can define for how long content shall be available and for how long purchased material can be used by the subscriber.

You can also take content from your system. You can remove it from the storefronts only or from all subscribers' inboxes at only one click, even replacing it with something else.
